Fatal Work Injuries in Oregon – 2015

Fatal work injuries totaled 44 in 2015 for Oregon, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Richard Holden noted that the number of work-related fatalities in Oregon decreased from 69 in the previous year. Fatal occupational injuries in the state have ranged from a high of 88 in 1992 to a low of 43 in 2012. (See [chart 1](#).)

Nationwide, a total of 4,836 fatal work injuries were recorded in 2015, a slight increase from the 4,821 fatal injuries in 2014, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

Chart 1. Total fatal occupational injuries, Oregon, 2006–2015

SOURCE: U.S. Bureau of Labor Statistics.

Type of incident

In Oregon, transportation incidents resulted in 22 fatal work injuries, accounting for half of all workplace fatalities in the state. (See [table 1](#).) The number of worker deaths from transportation incidents decreased by seven over the year.

Contact with objects and equipment was the second-most frequent fatal work event with eight fatalities, down five from the prior year. Violence and other injuries by persons or animals and falls, slips, or trips each resulted in five work-related deaths, a decrease of seven and five, respectively, from 2014.

Nationally, transportation incidents were the most frequent fatal workplace event in 2015, accounting for approximately 42 percent of fatal work injuries. (See [chart 2](#).) Falls, slips, or trips was the second-most frequent type of event (17 percent), followed by contact with objects and equipment (15 percent) and violence and other injuries by persons or animals (15 percent).

Chart 2. Fatal occupational injuries by selected event, United States and Oregon, 2015

Industry

The private agriculture, forestry, fishing and hunting industry sector had the largest number of fatalities in Oregon with 12, down from 19 in the previous year. (See [table 2](#).) Transportation incidents and contact with objects and equipment each accounted for five worker deaths. Half of those fatally injured in this sector worked in logging.

The private transportation and warehousing sector had nine workplace fatalities, down four from the previous year. Specialized freight trucking accounted for 4 of the 9 fatal injuries in this industry.

Occupation

Transportation and material moving occupations had the highest number of workplace fatalities with 16. (See [table 3](#).) The majority of the fatalities were heavy and tractor-trailer truck drivers (11). Management occupations had seven workplace fatalities. Farmers, ranchers, and other agricultural managers accounted for four of these fatalities.

Additional highlights:

- Men accounted for 93 percent of the work-related fatalities in Oregon, matching the national share. (See [table 4](#).) Transportation incidents made up 51 percent of the fatalities for men in Oregon.
- White non-Hispanics accounted for 84 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.
- Workers 25-54 years old accounted for 61 percent of the state's work-related fatalities in 2015, compared to 57 percent of on-the-job fatalities nationally.
- Of the 44 fatally-injured workers in Oregon, 73 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for both groups of workers was transportation incidents.

Change in the Census of Fatal Occupational Injuries (CFOI) News Release Schedule

Beginning with the 2015 reference year, CFOI will publish a single, annual release with no revisions. A similar schedule will be followed in subsequent years. Preliminary releases, which normally appeared in August or September in past years, will no longer be produced.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2015 data, over 21,400 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS web site at www.bls.gov/opub/hom/pdf/homch9.pdf.

Federal/State agency coverage. The Census of Fatal Occupational Injuries includes data for all fatal work injuries, whether the decedent was working in a job covered by the Occupational Safety and Health Administration (OSHA) or other federal or state agencies or was outside the scope of regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency.

Acknowledgments. BLS appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200. Federal Relay Service: (800) 877-8339.

Table 1. Fatal occupational injuries by event or exposure, Oregon, 2014–15

Event or exposure ⁽¹⁾	2014	2015	
	Number	Number	Percent

Footnotes:

(1) Occupation data are based on the Standard Occupational Classification system, 2010.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

Table 4. Fatal occupational injuries by worker characteristics, Oregon, 2014–15

Worker characteristics	2014	2015	
	Number	Number	Percent
Total.....	69	44	100
Employee status			
Wage and salary workers ⁽¹⁾	52	32	73
Self-employed ⁽²⁾	17	12	27
Gender			
Men.....	60	41	93
Women.....	9	3	7
Age ⁽³⁾			
25 to 34 years.....	10	3	7
35 to 44 years.....	15	11	25
45 to 54 years.....	13	13	30
55 to 64 years.....	18	9	20
65 years and over.....	10	5	11
Race or ethnic origin ⁽⁴⁾			
White, non-Hispanic.....	58	37	84
Hispanic or Latino.....	8	5	11

Footnotes:

(1) May include volunteers and workers receiving other types of compensation.

(2) Includes self-employed workers, owners of unincorporated businesses and farms, paid and unpaid family workers, and may include some owners of incorporated businesses or members of partnerships.

(3) Information may not be available for all age groups.

(4) Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude Hispanic and Latino workers.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.
